

# Chameleon Discovery NX VUE Harmonics

## Visible and Ultraviolet Extension for Chameleon Discovery Lasers

Chameleon Discovery NX VUE is a Harmonics Generator for producing visible and UV wavelengths in an automated hands-free package.

When combined with the octave spanning tuning range of the Chameleon Discovery laser, users can access gap free output from 330 nm to 1320 nm. Ideal for ultrafast spectroscopy applications.

Discovery VUE SHG can communicate with the Discovery GUI software to automatically optimize crystal phase-matching as the wavelength of the fundamental laser varies. The modular instrument design focuses on user-friendliness and compactness, with software-controlled wavelength tuning available.

The unit is also compatible with the Total Power Control (TPC) option for Chameleon Discovery which enables fast and precise power modulation at all wavelengths
