

Sapphire SF NX

CW Free Space and Fiber Pigtailed Single-Frequency Lasers

Sapphire SF NX is a series of compact CW visible single-frequency lasers based on Coherent's unique OPSSL (Optically Pumped Semiconductor Laser) technology. Sapphire SF NX lasers come with an ultra-narrow linewidth of <1.5 MHz, a high quality diffraction-limited beam with excellent pointing stability, high power stability and low noise.

Sapphire lasers are manufactured in cleanrooms using Coherent's patented PermAlign™ technology for optimal aligning and solder-bonding the optics. Sapphire SF NX lasers come with a flexible interface concept: Analog, RS-232 or USB – it is up to the user to select the appropriate communication channel.

Sapphire SF NX lasers are intended for applications that need narrow and ultra-narrow linewidth light such as Raman spectroscopy, interferometry, holography, metrology, and inspection.
