

Diamond J-2

RF Excited OEM Industrial CO₂ Laser

The Coherent Diamond J-2 Series are sealed, pulsed CO₂ lasers offering average power greater than 150 Watts in a fully integrated and compact package. The unique pulsing characteristics derived from its slab discharge design enable the J-2 Series laser to reach peak powers well in excess of 450 W in contrast to CW modulated lasers. The J-2 Series lasers are available in 10.6 μm, 10.2 μm, and 9.4 μm, and can be operated with pulsed repetition rates up to 200 kHz with fast pulse rise and fall times. This combination of wavelength selection, high peak power and fast rise and fall time times, together with power on demand and excellent beam quality makes the J-Series an ideal laser for a wide range of materials processing applications.

The J-2 Series is part of the J-Series family spanning a power range from 150 W to greater than 500 W. The J-Series family is built on a common platform with common mechanical, electrical, and optical interfaces, common software, and a common service and support strategy. All J-Series lasers offer proactive maintenance capability enabled by the integrated yet field serviceable RF power supply design and overall systems monitoring using Coherent's field proven full suite of on-board diagnostics.
