## PowerLine E Series

## High-Performance DPSS Laser Markers

PowerLine E Series are Class 4 laser marking sub-systems ideal for applications where mark quality, aesthetics and legibility are critical. They combine a diode-pumped, solid-state laser (with infrared, green, or ultraviolet output), with high-performance scanning and beam delivery optics, drive electronics, and powerful control software to yield a fast, flexible and accurate marking platform. The included Visual Laser Marker (VLM) applications software enables mark artwork to be transferred directly from a computer to the marker, and supports a number of sophisticated functions, including marking-on-the-fly and 3D marking, and marking of variable data (bar codes, serial numbers).

## FEATURES

- Compact design for easy integration
- Water/air cooling
- Precision optics for superior mark quality
- Powerful VLM marking software
- Control by PC, PLC, or fieldbus
- Versatile configuration options including optical z-axis, internal power sensor, positioning lasers

## APPLICATIONS

- Semiconductor IC and Wafer Marking
- Organics and Glass Marking
- Marking-on-the-Fly (conveyor belt or rotary axis)
- SmartMap3D Freeform Marking
- High-Precision Marking with Vision System

| Standard Software | Visual Laser Marker (VLM), Visual Marking Controller (VMC2), Laser Console,RCU.exe |  |  |  |  |  |
| Marking Objects | Vector graphics, text, logos, ring, bitmap, banding |  |  |  |  |  |
| Barcodes | GS1 DataBar, Code 39, Code 128, EAN8, EAN13, UPC-A, UPC-E, BookLan and others |  |  |  |  |  |
| 2D Codes | ECC200, Code 49, Micro-PDF417 and other data matrix and QR codes |  |  |  |  |  |
| Optional Software Features | MJC (Marker Job Control), HK (Host Coupling), Marking-on-the-Fly (MoF), SmartMap3D, CAD Extension, AI, PDF and PS Import, SECS/GEM |  |  |  |  |  |
| Operating System | Windows 10 |  |  |  |  |  |
| Certificates | PowerLine E laser markers comply with the following international standards: EN 60825-1:2014, EN 55011:2009/A1:2010, EN 61000-6-4:2007, EN 61000-6-2:2005, EN 61000-3-2:2014, EN 61000-3-3:2013, 47 CRF Part 18 ICES-003 Issue 4:2004, CDRH (radiation) standard. |  |  |  |  |  |

Notes:

1. Requires Host Coupling HK, Marker Job Control (MJC) or SECS/GEM software feature.
2. Requires an RS-232-to-USB-adapter.
3. The fieldbus interface is provided by a fieldbus coupler. The fieldbus coupler is connected to the supply unit by Fast Ethernet connection.

## MECHANICAL SPECIFICATIONS

PowerLine E 30 (ITX), PowerLine E 12 SHG (ITX) / E 20 SHG (ITX), PowerLine E 20 THG (ITX), cable connected at rear of laser head

## MECHANICAL SPECIFICATIONS

PowerLine E 30 (ITX), PowerLine E 12 SHG (ITX) / E 20 SHG (ITX), PowerLine E 20 THG (ITX), cable connected at bottom of laser head
