

MOTH-EYE STRUCTURED AR FILM

The moth-eye structured film is the next generation of antireflective film, with super-strong antireflective, transparent, and hydrophobic properties.

FEATURES

- Large FOV
- Wide wavelength range
- Super water-repellent
- Super anti-reflective and transparent
- Cost-competitive

APPLICATIONS

- Digital signage
- Show cases and show windows
- Frames for paintings, photographs, and more

Average reflectance (wavelength: 400-700 nm; angle of incidence: 0~60°)	$\leq 1\%$
Contact angle (pure water)	$\geq 130^\circ$
